

STOP THE PROPOSED OIL AND GAS DEPOT

Northern Energy Ltd are consulting on the proposal to relocate their main headquarters, including the entire oil and gas distribution business onto an existing 6 acre piece of open farmland between Arkendale and Marton cum Grafton.

This new office, distribution and oil and gas storage facility will be used to serve as far away as East Anglia and Southern Scotland.

**We ask all residents to please look at the plans and make your thoughts known at the earliest opportunity.
The consultation documents can be found at:**

<https://www.elgplanning.co.uk/consultation/northern-energy-marton-cum-grafton>

Key issues you may wish to consider:

- Proximity to local residents of a high risk site**
- 200 additional vehicle movements per day including LGV's on the A168**
- Further industrialisation of the A168 Corridor**
- Loss of good quality agricultural land**

Arkendale, Coneythorpe and Clareton Parish Council January 2021
